For Immediate Release  
July 27, 2009

**Livermore, CA** – Associated Builders and Contractors (ABC) Golden Gate Chapter has launched a new state-approved Electrician Trainee (ET) Program as a result of legislation passed in 1999 requiring all electricians who work for a C-10 electrical contractor to be certified by the state of California.

Regulations from that legislation were put in place in 2002, setting deadlines for all categories of electricians. Many of those deadlines have already passed. ABC Golden Gate Chapter will offer “in person” and “live webcast” courses beginning as early as August.

To enroll in the ET program and participate in ABC Golden Gate Chapter's training programs, visit the ABC Golden Gate Chapter website at [www.abcggc.org](http://www.abcggc.org).
